*“Make
Open Science
a reality
in Transport
Research”*

METHODOLOGY: mega themes to operationalize Open Science in transport

- ❑ WP1 to provide contents of stakeholders views of different transport domains to the **'Rules of Participation WG'**
- ❑ WP2 to work out on EOSC interface (now available in beta version beta.beopenaire.eu) and to provide further recommendations to the **'Architecture WG'** regarding transport research
- ❑ WP3 to identify important and suitable services for transport and provide input to **'Architecture WG'**
- ❑ WP3 & WP5 to provide mechanisms facilitating alignment between EOSC, national and BE OPEN initiatives and therefore input to the **'Sustainability WG'**
- ❑ WP4 to synchronize and cross-reference the EOSC **'Rules of Participation WG'** with the BE OPEN Code of Conduct
- ❑ WP4 & WP5 to provide recommendations on how to regulate the EOSC transport ecosystem by assessing the impact that the proposed structures and funding streams could have on transport stakeholders at national and EU level, and therefore contribute to the **'Sustainability WG'**
