

BE OPEN

This project has received funding from
the European Union's Horizon 2020
Research and Innovation Programme
under Grant Agreement No 824323

European forum and oBsErVatory for OPEN science in transport

BE OPEN project – A new initiative for Open Science in Transport

Caroline Alméras, ECTRI

Open Science in Transport Interactive Workshop (Session 8) - FIRM 19

March 28th, 2019, BluePoint, Brussels, Belgium

BE OPEN Project – Factsheet

European forum and oBsErvatory for OPEN science in transport

- Call: H2020-MG-2018-SingleStage-INEA – Submission April 2018
- Type of Action: Coordination and Support Action
- Acronym: BE OPEN
- GA Number: 824323
- Duration: 30 months
- Start Date: 2019-01-01
- Budget: € 1,997,283.75

BE OPEN Partners

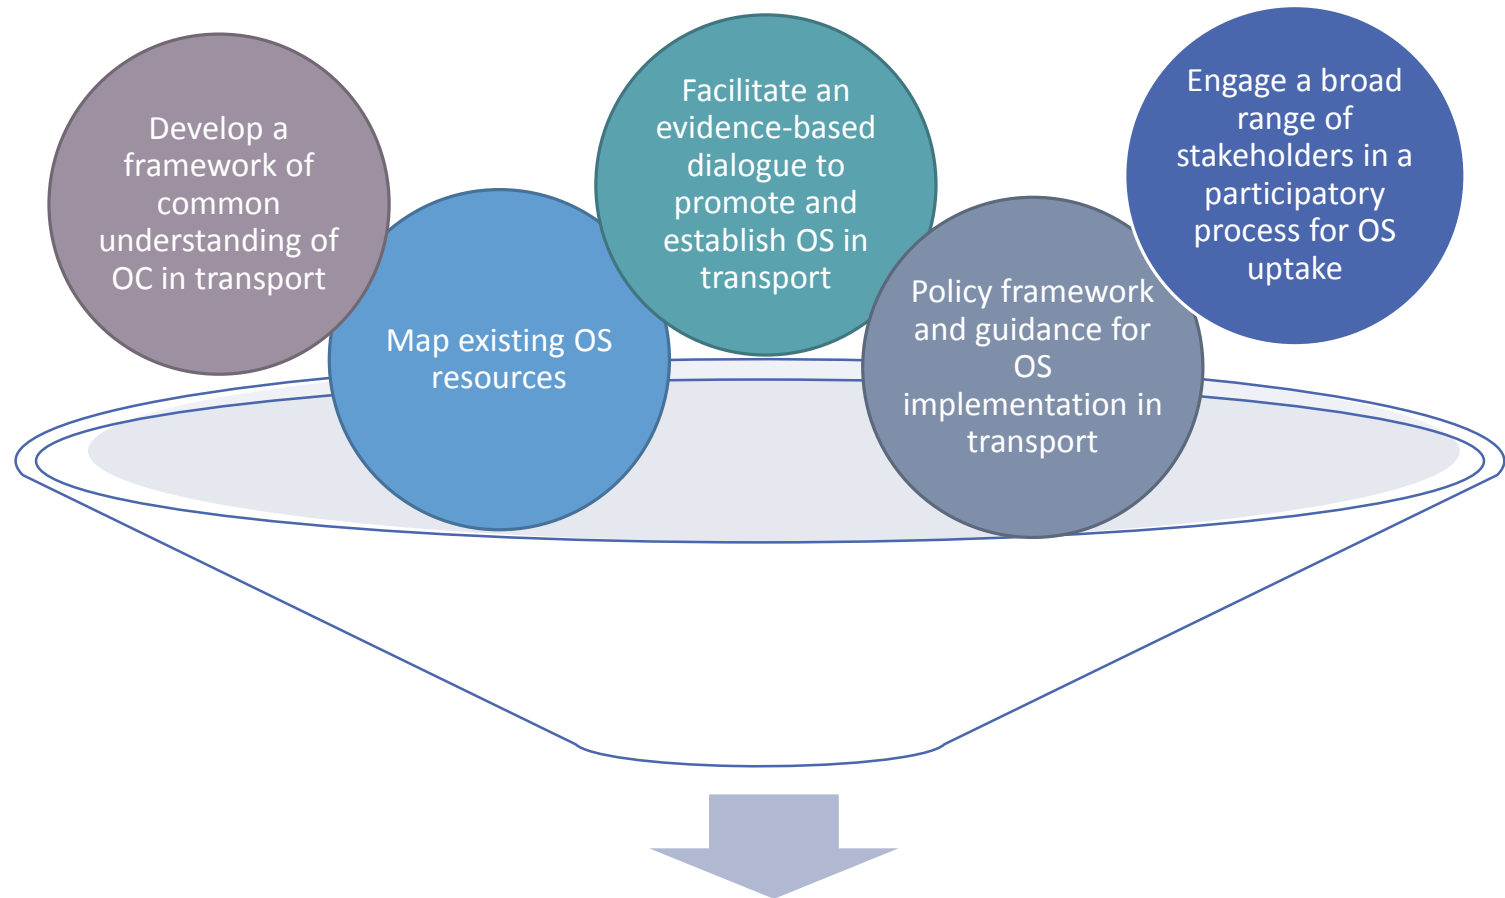

EATEO
European Association
of Aviation Training
and Educational Organisations

Third parties

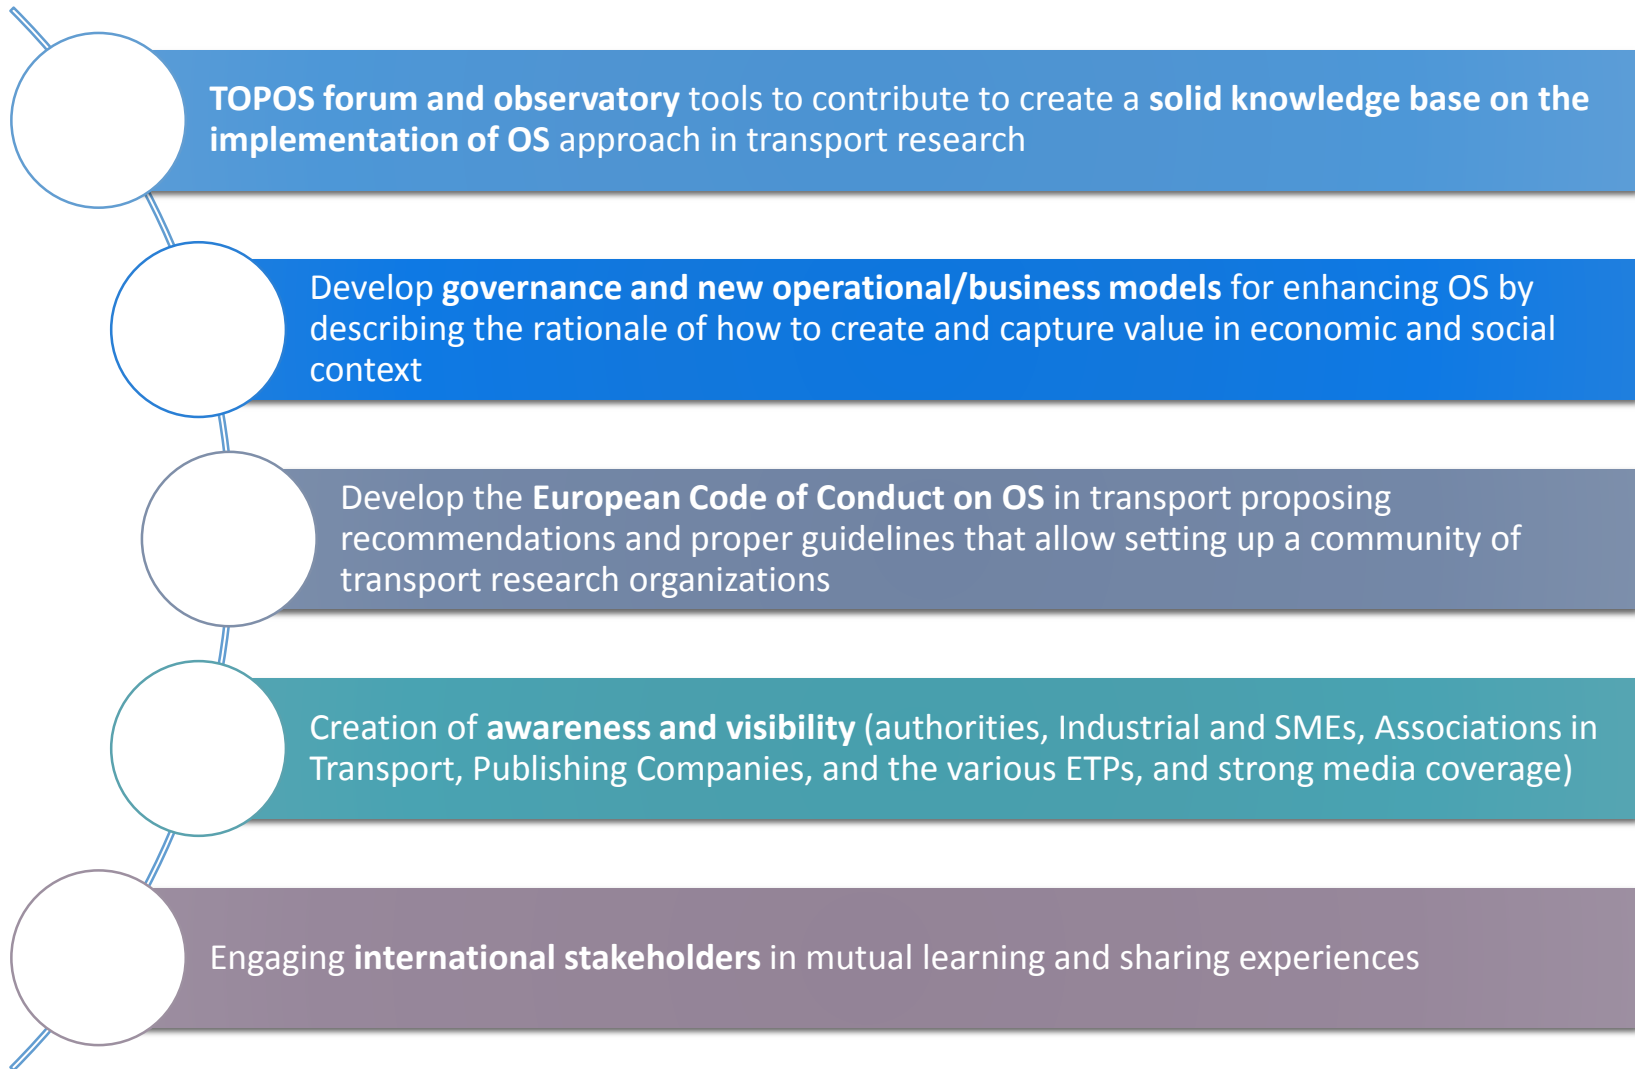

BE OPEN Objectives

***Promote, regulate and standardise
Open Science in Transport***

BE OPEN Expected Outcomes

BE OPEN Work Structure

BE OPEN Deliverables (1)

D1.1 Taxonomy of actors, terminology and experimental tools

D1.2 Framework of common understanding of Open Science in transport Sector

D1.3 Use case catalogue for future research

D2.1 Open access publications and the performance of the European transport Research

D2.2 Open/FAIR data, software and infrastructure in European transport research

D2.3 Transport Research in the European Open Science Cloud

D2.4 Governance and operational/business models for Open Science in European Transport research

D3.1 TOPOS declaration

D3.2 TOPOS development

D3.3 TOPOS observatory

D3.4 Strategy for pan-European diffusion and global links

D3.5 TOPOS forum and observatory Sustainability Analysis Assessment

BE OPEN Deliverables (2)

D4.1 Open Science in transport research: legal issues and fundamental principles

D4.2 Transport Open Data: Properties and Specifications for Open Science

D4.3 New business models to implement Open Access in transport research

D4.4 European Code of Conduct on Open Science in Transport

D5.1 Main challenges and opportunities, constraints and bottlenecks of Open Science in transport research

D5.2 KPIs for Open Science in transport evaluation

D5.3 Impact assessment of Open Science in transport

D5.4 Roadmap and guidelines to promote Open Science in transport research

Key events for stakeholders engagement

- ❖ **First project event @ OPEN SCIENCE FAIR**
Sept. 16-18, Porto, Portugal
- ❖ International Workshop in Oct. 2020
(tentatively @ETC2020, Milano)
- ❖ Final project event in April 2021, Brussels

THANKS FOR YOUR ATTENTION

Working together to build open science platforms in
transport research

BE OPEN contributions to expected impacts of Horizon 2020

Innovative solutions for an accessible & inclusive transport system

BE OPEN supports fully modern Open Science services (i.e. Open Access, Open Data, Open software, infrastructure, Open Peer Review, Open Education or Citizen Science) in transport research by developing the TOPOS forum and observatory tools for research community, industry and society/citizens that will contribute to creating a solid knowledge base on the implementation of Open Science approach in transport research.

BE OPEN contributions to expected impacts of Horizon 2020

Behavioural issues and user need

To achieve this, the BE OPEN project focuses on the objectives and needs of the spectrum of stakeholders (i.e. –both public and private– research community, industry and the society/citizens) and it also develops governance and new operational/business models for enhancing Open Science by describing the rationale of how to create and capture value in economic and social context.

What are the needs of the infrastructure owners and operators for open science services?

BE OPEN contributions to expected impacts of Horizon 2020

Appropriate regulatory frameworks and policies to support innovation and deployment

BE OPEN project develops the European Code of Conduct on Open Science in transport and proposes recommendations and proper guidelines that allow setting up a community of transport research organizations which will work on the basis of a commonly agreed roadmap making transport science more efficient and more responsive to societal and economic expectations.

What would infrastructure owners and operators like to see in the Code of Conduct that would enable them actively participate in making transport science more efficient and responsive to societal and economic expectations?

BE OPEN contributions to expected impacts of Horizon 2020

Dissemination and exploitation of sustainable mobility solutions

In the context of the BE OPEN project, a dissemination strategy will be provided to create awareness and visibility that can raise the interest of authorities, Industrial and SMEs Associations in Transport, Publishing Companies, and the various European Technology Platforms (ETPs) in transport – as well as attract strong media coverage (traditional and social). Moreover, international stakeholders will be engaged in mutual learning and sharing experiences, and in exploiting successful approaches for operationalising Open Science principles in transport research.

How can infrastructure owners and operators assist in operationalising Open Science in transport research?
